SAP solutions for hardware and home improvement

| BEYONDTECHNOLOGIES.COM

The retail industry today

Retail has become one of the industries most impacted by the advancements of digital transformation. The way consumers make their purchasing decisions has dramatically changed. Consumers can now walk into a store using their smartphones to compare prices and review products.

With the rise of online giants carving out huge chunks of the home improvement and hardware market, smaller retailers need to adopt the latest technologies to keep up with the competition and ensure they meet industry priorities. Beyond Technologies offers the best of both worlds: seasoned experts with years of practical retail experience acquired with retailers of all sizes, backed by solid knowledge of SAP's retail solutions.

Priorities for hardware and home improvement retailers

Offering competitive prices

With a growing number of SKUs, hardware retailers benefit tremendously from centralized pricing & promotion management to consistently offer the best deals and stay ahead of the competition

Managing a disrupted supply chain

Hardware and home improvement retailers must keep up with increasingly complex supply chain constraints and shortages by having the right tools to make informed decisions when it comes to supply & demand

Streamlining logistics

With large product portfolios to manage and complex material sourcing, access to real-time data can ensure retailers manage their supply chain efficiently and cost-effectively

Going Beyond products

While customer behavior continues to evolve, hardware retailers must strive to provide them with a unique, personalized shopping experience and value-added services and expert advice across all channels to truly become a one-stop-shop

Get the facts

SAP customers represent 98% of the top 100 most valued brands in the world

200 out of 250 Top Retailers globally run SAP solutions

18 of the 25 fastest growing retailers run SAP solutions
